

Sustain your installed base using
AfterMarket Solutions

Exchange programme

What you get

- Bare block
- A block based on the serial number of the original compressor block, i.e. "as built"
- Test run
- Leak test up to 26 bar
- Pressure strength test on blocks in which new pressurised parts have been used
- Fixed core credit depending on return block condition.

Additional services on request

- Test run and pressure test certificates
- Upgrade parts
- Retrofit.

Advantages and benefits

- Test run compressor block directly from shelf, ready for start up
- Significant reductions in downtime
- Planning of the service/maintenance is under the end user's fully control
- Compressor blocks can be exchanged at the most convenient time for your customer
- Specialist equipment and expertise
- Use of genuine spare parts
- Fixed price for both new and rebuilt compressor blocks are ensured
- Rebuilt blocks look as good as new compressors and have virtually the same capacity and performance
- Opportunities to finalise the deal with your customer on site are high
- Keeping your compressor equipment operating at peak efficiency for an exceptionally long time.

Guarantees

- A 24-month guarantee is provided for all exchange compressor blocks.
