

Terms for extended 3 year warranty for compressor blocks upgraded to SABROE® Long-Life

Relevant information on service, service intervals and service sets
*For SMC, TSMC and HPC compressors (Mk4 Mk3, all refrigerants)
upgraded with long-life parts*

In order for the extended 3-year warranty to be applicable for your long-life upgraded compressor, the following must be fulfilled:

A. REGISTER ON EASYPARTS

Register your compressor and service carried out on EasyParts.

Guide for registration at: www.sabroe.com/en/parts/easyparts-info/easyparts-user-guides/

B. INSPECTION AND REPLACEMENT OF PARTS

Inspection and replacement of both normal wear and recommended parts, according to the intervals specified in the Mk5 service manual and to the following cycles of preventive maintenance:

- 1st service interval: Use service set "A"
- 2nd service interval: Use service set "A" and "A supplementary"
- 3rd service interval: Use service set "A"
- 4th service interval: Use service set "C"

The service sets include parts that should always be replaced, regardless of how they appear when the compressor is opened. Repeat the above cycle throughout the full warranty period.

C. YEARLY OIL ANALYSIS

Yearly oil analysis utilizing an oil analysis kit obtained from the Johnson Controls Parts Center.
